Delivering the Value of Technology

ElegantJ Charts Designer

Visualize THE Information Power

ISO 9001:2008

OVERVIEW

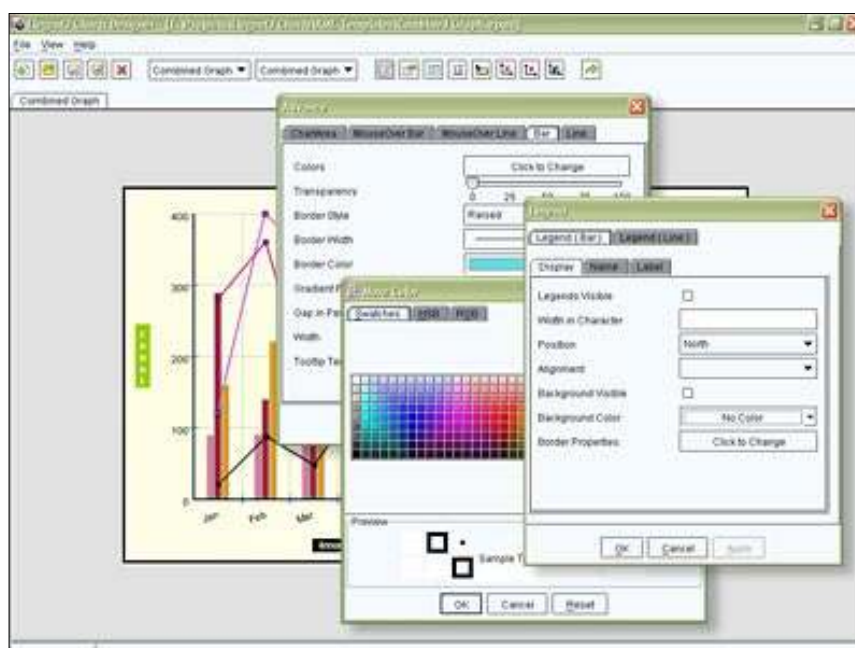

ElegantJ Charts Designer is a fully functional XML template designer for ElegantJ Charts. ElegantJ Charts Designer is a huge collection of ready-to-use XML templates, which can be used as is, or modified to suit your presentation requirements. ElegantJ Chart Designer eliminates the need to write hundreds of lines of your own source code or use third party IDEs. Its point-and-click graphical user interface allows charts to be created quickly with an almost infinite degree of flexibility.

A developer has three ways to use charts in an application:

- ▶ Write your own code
- ▶ Use third party IDEs
- ▶ Use ElegantJ Chart Designer IDE

The first two options often involve tedious work, waste of your precious time in writing lengthy source code or splurging money on a third party IDE. But ElegantJ Charts Designer can set you free from that.

ElegantJ Charts Designer is a platform independent, fully functional XML template designer for ElegantJ Charts. Our Charts Designer provides a state-of-art interoperability and integration options through ready to use XML templates that can also be customized to suit your presentation requirements

This out and out Java tool has point-and-click graphical user interface that allows faster chart creation with utmost flexibility. The buzz word is WYSIWYG - What you see is what you get - as you can monitor the changes you are making in a real time 3-D environment.

Display your data in best possible way through customizable chart designer elements and easily import these templates with a single line of source code. The end result is a visually striking and stimulating data display that takes less than 5 minutes without any technical Java expertise!

SALIENT FEATURES

This designer IDE with our unique process is a software with slick features that help you in designing Java Charts that suit your requirements. Here are the features:

- ▶ A platform independent 100% Java tool
- ▶ Real-time point-and-click WYSIWYG environment
- ▶ Huge collection of ready-to-use XML templates
- ▶ Ensures ultimate interoperability, integration and deployment through XML
- ▶ Eliminates need for third party IDEs
- ▶ Reduces development cost
- ▶ Saves development time
- ▶ Least technical skills requirement
- ▶ Empowers end users to create attractive Java Charts

USING THE DESIGNER

ElegantJ Chart Designer IDE is a platform independent graphical designer tool that can be operated from most desktop computers. With an intuitive interface, Chart Designer helps a developer in creating XML templates for visually stunning charts in minutes.

How can using ElegantJ Chart Designer help you?

- ▶ This Chart Designer supports EJXML to help you dynamically control the visual properties of Java charts
- ▶ Point-and-click graphical user interface will allow faster chart creation with utmost flexibility
- ▶ A state-of-art interoperability and integration options with ready to use XML templates to suit your presentation requirements will speed up a complex process for you
- ▶ Even Graphic designers or novice programmers can use ElegantJCharts to configure complex and eye-catching charts
- ▶ You can easily import these templates as Java Charts into your application, with minimum source code

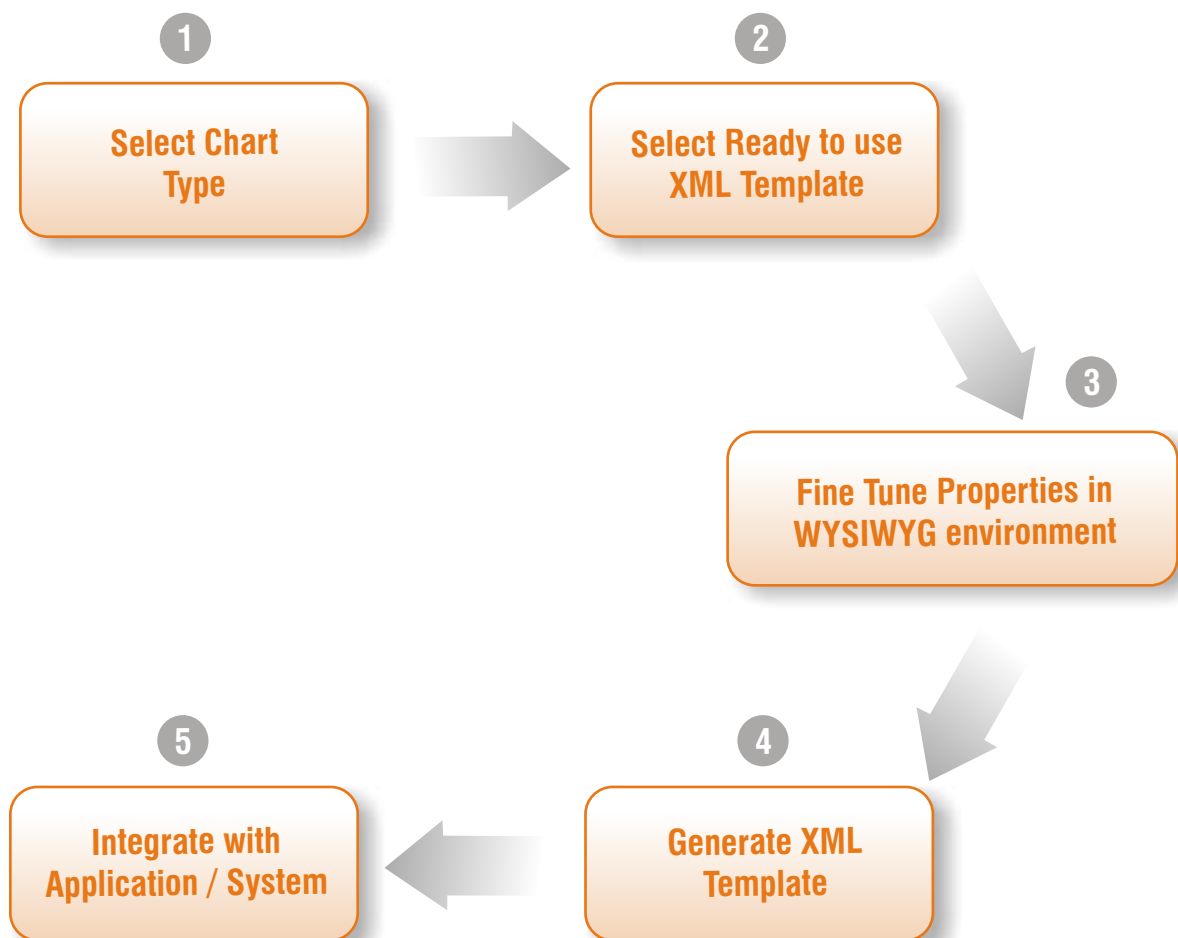

HOW CAN USE OF EJXML FORMAT HELP?

EJXML format is superset of XML. Whereas XML is a general and loose format for describing data, EJXML is a rigid and robust XML document type created specifically for defining ElegantJ Charts. EJXML format supports Java Chart configuration options as well as chart data.

MAGICAL CHARTS IN MINUTES!

Along with flexibility of integrating chart library in your application in an exclusive way through a comprehensive API and using chart components in your favorite Java IDE, take advantage of ElegantJCharts Designer IDE for the visual configuration of charts with the help of numerous ready to use XML templates with 3-D preview and depth control. This would be a great time saver as all programmer (or developer) would need to do is, follow our unique process:

And Voila, your charts are ready to be used in application!

One of the best parts of our product is that the user would have no need of any training or Java programming skill set or pay for expensive third party designer IDE. Even graphic designers or entry level programmers can use ElegantJCharts to configure complex and eye-catching charts as they would work in easy to use drag and drop WYSIWYG environment. Interoperability through XML and closets full of ready to use XML templates help in simplifying an otherwise time consuming, pricey and complex process.
